**COVERPC104**

Perspex cover for our range of PC104 cards.

**Description**

5V/2.5A and 12V/1.25A DC power supply suitable for our range of Serial port cards. IEC mains input connection and supplied with a 2.1 mm connector. Over current, short circuit and overvoltage protected. Supplied with a 1.8 metre lead. 90V to 260V AC. Dimensions 95(L)35(W)35(H).

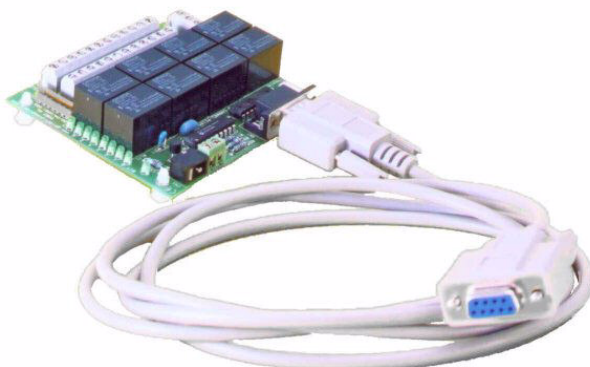

**Order codes**

**PSUIEC5V**

5V/2.5A DC PSU with IEC inputs.

**PSUIEC12V**

12V/1.25A DC PSU with IEC input.

**Description**

2 metre serial port cable. Male 9 way D type male connector at one and female 9 way D type at the other end. Designed to connect any of our range of serial port cards to a standard serial port connector.

**Order codes**

**SERCABLE2M**

2 metre serial port cable.

**Product Datasheet 18**

**Description**

This data cable is designed to connect to a standard USB connector and convert the USB port to a standard RS232 port. It comes with install software which, following auto-detect of the USB connection, installs the appropriate drivers and causes the USB connection to appear to the Operating System as an additional serial comms port. This can then be accessed via it's appropriate comms port number. The cable connects to a standard USB port (PC or Mac). It has a male 9 pin serial port connector for connection to any of the EasyDAQ range of serial port products. Connection length can be extended by using the serial port cable shown below.

**Order codes**

**USBCABLE**

Perspex cover for our range of PC104 cards.

**Description**

2 metre mains cables with IEC connectors fitted. UK and international versions available
